

LEEN KHALED SABRI

Junior Software Developer | Backend & Full-Stack

Al-Bireh, Palestine | leen.sabri22@gmail.com | [linkedin.com/in/leen-sabri](https://www.linkedin.com/in/leen-sabri) | github.com/LeenSabri

PROFESSIONAL SUMMARY

Computer Science graduate from Birzeit University with hands-on experience in backend and full-stack development using Python, FastAPI, NestJS, TypeScript, PostgreSQL, Supabase, Flutter, and web technologies. Built RESTful APIs, authentication and authorization flows, database integrations, real-time features, push notifications, and user-facing applications through an internship and team projects. Seeking a junior backend or full-stack role.

TECHNICAL SKILLS

Backend & APIs: Python, FastAPI, NestJS, TypeScript, RESTful APIs, CRUD, Authentication & Authorization

Databases: PostgreSQL, MySQL, Supabase

Languages: Python, TypeScript, JavaScript, Java, PHP, Dart, HTML5, CSS

Frontend & Mobile: Flutter (Web & Mobile), HTML5, CSS, JavaScript, Android (Java)

Tools & Platforms: Git, GitHub, Claude Code, Firebase Cloud Messaging, Railway, Linux/CLI

Core Knowledge: Data Structures & Algorithms, OOP, Database Design, API Integration

EXPERIENCE

Backend Developer - Intern Exsalt Technologies | Jul 2025 – Sep 2025 (240 hours)

- Created and tested 21 RESTful API endpoints for an AI-powered Markdown notes system using Python, FastAPI, and PostgreSQL, supporting CRUD, AI-generated summaries, grammar checking, version history, and Dropbox backup.
- Implemented request validation, PostgreSQL data access, error handling, and API organization across the 21 endpoints; diagnosed and resolved API integration issues during development.

PROJECTS

First Respond – Real-Time Emergency Response System (*Graduation Project*)

- Delivered NestJS and TypeScript backend workflows for emergency cases, user management, volunteer approval, and role-based access in a 3-member team across 3 user types.
- Integrated Supabase Realtime and Firebase Cloud Messaging to synchronize volunteer locations and mission status across Flutter web and mobile clients and deliver critical push notifications.
- Engineered and validated a Groq-powered recommendation feature across 8 emergency scenarios, ranking volunteers by distance, training history, accumulated points, availability, and active-case workload to support dispatcher selection.

Parental Monitoring Mobile Application (Usable Security)

- Engineered a Flutter app integrated with the "Luanti" game and backed by a NestJS API; designed a 3-way authentication flow and secure access control for monitoring children's chat activity.

Rental Management Website

- Delivered a PHP-based rental management website with 4 core workflows: authentication, property browsing, messaging, and administrator approval.

Athar - Missing Person Helper Platform: Integrated 4 external APIs with JavaScript and Leaflet for missing-person reporting, AI-assisted matching, nearby-service discovery, and voice first-aid guidance.

Computer Store Management System: Managed 4 functional areas: inventory, sales, employee records, and financial data using Java, JavaFX, and MySQL.

Huffman Compression Tool: Programmed 2 core operations, file compression and decompression in Java using Huffman coding algorithms.

Optimal Coin Strategy Game: Designed a Java strategy game that computes optimal moves to maximize the total coin value collected.

Statistical System for Martyrs: Developed a Java and JavaFX system trees and linked lists to generate statistics.

EDUCATION

B.Sc. in Computer Science - Birzeit University | 2022–2026 | GPA: 80% (Very Good)

Tawjihi Certificate - Al-Bireh New Secondary Girls School | 2021–2022 | Score: 90%

ACTIVITIES & ACHIEVEMENTS

- Completed 400 volunteer hours with Birzeit University, Al-Bireh Municipality, and the Palestine Red Crescent Society; led a community initiative with Al-Bireh Municipality.
- Competed in IEEE and local programming competitions; showcased a GPS-based navigation app for visually impaired users at the Palestine Science and Technology Fair.
- Earned the Claude 101 certificate from Anthropic.
